Preserve the existing API-driven canonical/redirect/sitemap/robots contract, 404/410 statuses, Search noindex, draft noindex/no-store, temporary-domain noindex, and original Host trust boundary. No frontend-only URL guessing.

C0 Standard visual design - token contract

DESIGN LOCK FOR NEXT PHASE: “Sage Editorial” is the product Standard. It uses the existing PAL-03 / TYPE-03 / TYPE-11 / HOME-03 / HERO-22 / CARD-03 / ART-14 vocabulary. Do not confuse it with technical SAFE_DEFAULT (PAL-28, TYPE-28, text-first fallback). The exact combined selection must be implemented and accepted as a coordinated recipe.

Color palette - source: existing PAL-03 Sage Journal

Role	Value / usage
Primary	#285047 for approved link/button treatments, headings and active navigation.
Text	#1D2B28 for main reading text; do not use decorative gold for small-body text.
Background / surfaces	#FBF7EE page background, #FFFFFF article/card/readable surface.
Muted	#66736F for secondary text; must meet contrast in exact contexts.
Secondary / accent	#C66C4B restrained supportive accent; #D1A23B decorative only unless contrast-verified.
Focus / semantic	PAL-03 focus #285047; existing validated semantic success/warning/error colors retained.

Typography and language

Role	English / Hindi	Desktop -> mobile
Headings	Lora TYPE-03 / Tiro Devanagari Hindi TYPE-11	H1 46 -> 32 px; H2 30 -> 24 px.
Body	Source Sans 3 TYPE-03 / Mukta TYPE-11	Article 18 -> 17 px; UI 16 px.
Cards	Same locale-aware heading/body pair	Title 21 -> 19 px; maximum 3 visual lines when safe.
Meta / labels	Source Sans 3 / Mukta with normal script fallback	13-14 px; accessible color/weight.
Long-form	Left aligned, generous paragraph rhythm	Line-height 1.7-1.8; constrain reading width.

TYPE SAFETY

The existing resolver limits Hindi-first typography profiles to TYPE-11, TYPE-12, TYPE-21 or TYPE-22; mixed-script and late-loading fallback need browser proof. Do not override Hindi pages with an English-only preset and hope for accidental fallback.

C1 Standard spacing, geometry and components

Token / component	Exact planned treatment
Page main width	max-width: 1200px; side padding desktop 24-32px, tablet 24px, mobile 16px; always allow 320px.
Reading width	article and static legal reading body 720-760px max; no full-width 1200px legal paragraphs.
Vertical rhythm	8px base: sections 48-64px desktop, 32-40px mobile; component gaps 12/16/24px.
Grid	>=1024px 3 columns, 768-1023px 2, <=767px 1; no overflow at 320px.
Image treatment	16:9 article preview; no upscaling/distortion; article-body media natural aspect; caption outside image.
Article card	CARD-03 Image Top Editorial; image -> category -> title -> excerpt (optional) -> valid meta.
Card details	White surface, subtle border #DDD5C6, 12px corners; hover/focus not dependent on color only.
Hero	HERO-22 quiet lead only when a real eligible featured article exists; no fabricated hero copy.
Category / author	CAT-02 text tile accent; AUTH-04 editorial bio; missing media falls back to text.
Actions / forms	Accessible solid primary buttons; 44px minimum touch target; visible keyboard focus.
Reduced motion	Transitions disabled/reduced under prefers-reduced-motion; no essential content in animation.

Standard recipe - primary profile IDs

Area	Approved target
Palette / typography	PAL-03 + TYPE-03 English or TYPE-11 Hindi
Home / hero	HOME-03 Journal Grid / HERO-22 Journal Quiet
Article card / category / author	CARD-03 / CAT-02 / AUTH-04
Article / collection	ART-14 / COL-01 (3-col desktop)
Related / search / tag / author collections	Reuse coherent image-top/list treatments, explicitly specified when implementing; do not inherit text-only silently.
Width / density / radius	WIDTH-WIDE + DENSITY-STANDARD + RADIUS-MEDIUM, subject to catalogue validation.

C2 Fixed Header, Footer and navigation

Header (same structure under every style)

Accessibility row	Skip-to-main, semantic header, one meaningful brand label, keyboard focus and mobile Escape handling.
Desktop >=1024	Logo/site title left (logo max approx 44px high); approved links center/right; Search action; no forced large site-name hero.
Tablet 768-1023	Balanced brand and compact navigation; collapse overlong links without clipping.
Mobile <=767	Brand + Search + Menu button; correctly labelled overlay/drawer, focus management, scroll locking and Close/Escape.
Navigation defaults	Home and Blog when archive is deployed; Search accessible; About/Contact/Legal only when enabled/eligible.

Footer (same structure under every style)

Block 1: brand	Site identity; optional approved publication description; no generic fabricated copyright.
Block 2: quick links	Approved site navigation in authored order; do not send users to disabled pages.
Block 3: legal/contact	Privacy, Terms, Disclaimer only if enabled; real contact/social values only when verified.
Responsive	Three conceptual blocks -> two -> one. No empty grid columns, fake contact info or unsupported social links.

Global shell invariants

- Only one visible H1 on each page, main landmark, accessible skip link and meaningful section-heading hierarchy.
- Logo asset must be same-site; display name fallback when no logo exists.
- No footer links to disabled information pages; no unsupported phone/email/physical address.
- Existing UF-01 navigation keyboard fixes are preserved; do not rewrite stable shell without a demonstrated defect.
- Standard is the rendered default appearance; all five presets may change presentation but not page semantics, data or nav eligibility.

PAGE 01 Home - complete design & data contract

Element	Required rule
Public route	/
Page authority	PUB-HOME-01
Data source	HomePageData: site + settings + navigation + intro + lead_article? + sections + latest_articles + SEO + presentation.
Admin/content owner	Site display name and future site-owned Home headline/intro; approved lead/section selections via existing Homepage Controls; posts come from CMS.

Standard page anatomy - top to bottom

Header	Same site-owned header / nav for all page families.
Editorial introduction	One H1, editable subject-specific introduction; text-only works with no media.
Lead story	Real lead_article only; HERO-22, otherwise omit hero without blank reserved area.
Curated selections	Real POST_SELECTION and CATEGORY_SELECTION data in authored/server-provided order, when populated.
Latest articles	Visible section label and actual published article list using CARD-03; honest empty state if none.
Footer	Real links/contact/approved legal destinations; no fake sections.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

H1 draft: Explore [Topic] with [Website Name].
Intro draft: Browse articles and resources about [approved subject]. New articles will appear here when published.
Latest label: Latest Articles. **Empty:** No articles have been published yet.

Required states and acceptance

0, 1, 3, 12 articles; lead missing/present; long Hindi brand; mixed script; missing logo/media; no categories; disabled sections. Never auto-create featured cards from latest posts.

SEO and security invariants

Indexability/canonical/title from backend-resolved Home SEO; no frontend-host-derived URL.

PAGE 02 All Blogs - complete design & data contract

Element	Required rule
Public route	/blog
Page authority	PUB-BLOG-01 (local report)
Data source	BlogPageData from locally extended public-page operation; tenant PUBLISHED rows, stable ordering, real cursor/page bounds and backend SEO.
Admin/content owner	Posts CMS owns articles; page template/grid is code-owned. Optional Blog intro is a future explicitly versioned content field if requested.

Standard page anatomy - top to bottom

Header + page intro	One H1: All Articles; optional site-owned intro field only if present in contract.
Article collection	CARD-03 with image/category/title/excerpt/date when available; 3/2/1 responsive grid.
Pagination	Server authoritative page count and prev/next; same-site canonical links; no guessed totals.
Footer	Standard shared footer.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

H1: All Articles. **Helper:** Browse published articles from [Website Name]. **Empty:** No articles have been published yet.

Required states and acceptance

First/middle/final pages, exactly one page, invalid page request, no posts; unpublished posts never shown; no blank-Search archive hack.

SEO and security invariants

Indexable public archive only if backend allows; canonical/pagination SEO decided by public API, not frontend guessed.

PAGE 03 Article - complete design & data contract

Element	Required rule
Public route	/article/[post_slug]
Page authority	PUB-ARTICLE-01
Data source	ArticlePageData with article + body.blocks + breadcrumbs + author/tags + related_content? + backend SEO.
Admin/content owner	Every article title, block, author, metadata, featured image, excerpt, categories and tags is managed in Posts/Media. The Article page itself is a template, not a separate editor.

Standard page anatomy - top to bottom

Breadcrumbs/category	Approved same-site destination or omission when absent.
Editorial header	One H1, optional category, byline, published date and other actual public metadata.
Featured media	Same-site image, alt/caption/credit where supplied; omit safely when absent.
Article body	Twelve typed article blocks, readable 740px measure and semantic heading/rich text.
Author/tags	Only public-safe author identity and real same-site taxonomy links.
Related posts	Only same-site eligible linked posts when supplied; coherent related card layout.
Footer	Shared website footer.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

No article copy is seeded. An article displays exactly its authored title, content blocks, media and public metadata. For a missing article, preserve genuine 404/410.

Required states and acceptance

All 12 blocks; long Hindi title; source links; quotation/list; responsive table; image missing; empty tags; author absent; related absent; preview private.

SEO and security invariants

Article canonical, OG and structured metadata from authoritative API; draft preview noindex/no-store.

PAGE 04 Search - complete design & data contract

Element	Required rule
Public route	/search
Page authority	PUB-SEARCH-01
Data source	Site-scoped public Search PageData with query state NO_QUERY / RESULTS / EMPTY and authoritative bounded pagination.
Admin/content owner	No separate page editor or manually authored results. Posts/Search and approved site identity supply content.

Standard page anatomy - top to bottom

H1	Search Articles with short helper line.
GET search form	Visible label, text input, submit and clear; focus state and keyboard accessible.
Results region	Same ArticleCard family as Blog; result count only if authoritative.
Pagination	Retain encoded query; changing query resets to first page.
Footer	Shared shell footer.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

Label: Search this website. **Placeholder:** Search articles. **NO_QUERY:** Enter a topic to search published articles. **EMPTY:** No articles matched your search. Try another keyword.

Required states and acceptance

Blank query never lists all posts; no results; results; network error/retry; query preserved on pagination; browser back/forward; stale fetch discards.

SEO and security invariants

Search route and query state remain NOINDEX. Never publish search results as an indexable canonical archive.

PAGE 05 About - complete design & data contract

Element	Required rule
Public route	/about
Page authority	PUB-STATIC-ABOUT-01
Data source	StaticPageData: content.title + intro_text? + ordered body_sections. Site-owned static_pages and access state.
Admin/content owner	Information Pages > About, using existing structured sections. Page may remain disabled until approved.

Standard page anatomy - top to bottom

H1 + intro	Who the publication is and what it covers, without fabricated owners/qualifications.
What we cover	Approved topic list/paragraphs, no imaginary claims.
How to use this site	Links to Blog, categories if present, and Search.
About the publisher	Optional owner-approved organization/editorial facts, never invented.
Footer	Global site footer.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

H1: About [Website Name].
Intro: [Website Name] is a publication focused on [approved topic].
What you will find: Browse the articles, categories and resources made available on this website.
How to explore: Visit All Articles or use Search to find a subject.

Required states and acceptance

One paragraph, many sections, long Hindi text, no logo, omitted optional facts, disabled/unavailable returns correct non-indexable status.

SEO and security invariants

Backend PageData SEO and eligibility; no hardcoded company identity or invented expertise.

PAGE 06 Contact - complete design & data contract

Element	Required rule
Public route	/contact
Page authority	PUB-STATIC-CONTACT-01
Data source	StaticPageData and approved contact_info from same-site settings; no contact-submission backend in V1.
Admin/content owner	Information Pages > Contact and site settings contact fields. Editor supplies verified details.

Standard page anatomy - top to bottom

H1 + intro	Clear contact-information page with a brief neutral introduction.
Verified methods	Email/tel/approved external links only when actual values exist.
Optional instructions	Owner-approved contact context, not invented office hours/address.
Unavailable state	Honest notice if no contact method exists; do not display dead form.
Footer	Shared site footer.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

H1: Contact [Website Name].
Intro: For inquiries about this website, use the contact details shown below.
No contact data: Contact information is not available on this page yet.

Required states and acceptance

Email only, multiple methods, no methods, invalid external URL, long Hindi labels, disabled page. No fake email/phone/address.

SEO and security invariants

Backend-controlled static page SEO; no unauthorized collection of personal data.

PAGE 07 Privacy Policy - complete design & data contract

Element	Required rule
Public route	/privacy-policy
Page authority	PUB-STATIC-PRIVACY-01
Data source	Site-owned information page; title, approved intro, ordered headings/paragraphs/lists; no arbitrary HTML.
Admin/content owner	Information Pages > Privacy. Draft stays disabled until verified against real platform practices and approved.

Standard page anatomy - top to bottom

Document header	H1 Privacy Policy; updated/version info only if authoritative data exists.
Identity / scope	Owner-reviewed description of the actual operator and site use.
Policy sections	Real practices around data collected, cookies, analytics, third parties, retention, rights and contact.
Navigation/footer	Readable links and footer; 740px reading width.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

Outline only; NOT public legal policy: Who operates the website; information collected; purposes; cookies; third parties; retention/rights where applicable; contact; updates.

Required states and acceptance

Missing policy remains unavailable; no false “we do not track” or retention promises; long headings and inline links work.

SEO and security invariants

Backend static-page eligibility, title and canonical. No legal claims added by React.

PAGE 08 Terms of Use - complete design & data contract

Element	Required rule
Public route	/terms-of-use
Page authority	PUB-STATIC-TERMS-01
Data source	Site-owned static PageData and real operator-approved Terms content.
Admin/content owner	Information Pages > Terms; require owner/legal review and enable explicitly.

Standard page anatomy - top to bottom

Document header	H1 Terms of Use; readable intro.
Approved sections	Site access, informational content, intellectual property, user restrictions if applicable, external links, updates.
Footer	Real legal and contact links.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

Outline only; NOT public legal policy: Scope/use, nature of content, intellectual property, external links, conditions and updates, support contact.

Required states and acceptance

No fabricated paid subscription, refund, paid plan, guarantee or governing jurisdiction facts. Preserve original page eligibility.

SEO and security invariants

Correct canonical/indexability controlled by public API.

PAGE 09 Disclaimer - complete design & data contract

Element	Required rule
Public route	/disclaimer
Page authority	PUB-STATIC-DISCLAIMER-01
Data source	Site-owned disclaimer content as structured information sections.
Admin/content owner	Information Pages > Disclaimer; review content carefully before enabling.

Standard page anatomy - top to bottom

H1 + key disclosure	Prominent approved introduction above detailed sections.
Scope	What the publisher actually provides, only as approved by owner.
Limitations	Appropriate caveats relating to published content and external resources.
Footer	Approved link destinations and contact.

Draft content or UI copy - NEVER hardcode into rendering

STARTER / UI COPY

Outline only; NOT public legal policy: Nature of publication, appropriate limitations, external links, corrections and contact.

Required states and acceptance

No generic invented astrology guarantees, medical/legal/financial assurances or practitioner claims. Empty/disabled remains controlled.

SEO and security invariants

Backend static-page SEO and real page state, not a frontend-written legal promise.

PAGE 10 Supporting and system pages

Page / route	Structure and source	Acceptance
Category /category/[slug]	Breadcrumbs -> H1 and approved description -> true article collection -> pagination.	Preserve same-site taxonomy and published only; no invented category counts or cover imagery.
Tag /tag/[slug]	Same collection engine using validated tag identity and bounded results.	No wrong-site tag/archive results; truthful empty state.
Author /author/[slug]	Public author profile/avatar or monogram -> verified bio -> article collection.	No private email/login data; optional bio/avatar; no wrong-site person.
404 / 410	Correct HTTP status, concise neutral text, allowed Home/Search recovery.	404 is not 200; 410 stays 410; no wrong-site branding.
Unknown domain	Neutral unbranded failure state; no tenant data.	Never leak another domain/site navigation/SEO.
Private preview	Authorized preview marker, noindex/nofollow/no-store, no token in outgoing links.	Site-owner preview only; not merely temporary noindex.
robots/sitemap	Existing API-backed crawler outputs and route rules.	Preserve authority and temporary/canonical policies.
503/contract error	Accessible friendly service problem; retry only when safe.	No swallowed API failures rendered as successful empty pages.

State-based test matrix

Data state	Expected rendering
0 published articles	Home intro + honest latest-empty; Blog empty; Search no query; header/footer still useful.
1 article	One real card; no blank grid slots or duplicate fake feature.
3 / 12 articles	Responsive 3/2/1 grid, real ordering and server pagination.
Missing media	Text-first image/card fallback; alt/caption behavior remains safe.
Hindi and long titles	Correct shaping, line breaks, font fallback, no horizontal overflow.
Disabled information page	No dead public link; correct not-found/eligibility state.
Different Host same path	Different authorized tenant PageData with zero visual/content leakage.

D0 Sample starter content - fixed pages only

This is **editable draft copy**, not site facts and not a new set of published articles. Each [placeholder] must be replaced by authorized owners before publication. Do not create sample blog posts, dates or author biographies. Keep legally sensitive texts disabled until reviewed.

Shared Home copy

HOME / DRAFT COPY

H1: Explore [Primary Topic] with [Website Name].
Intro: Welcome to [Website Name]. Browse published articles about [approved topic], explore the available subjects and use Search to find material of interest.
Labels: Featured Article, Explore Topics, Latest Articles, View All Articles.
0-post state: No articles have been published yet. New articles will appear here when available.

About - initial structured sections

ABOUT / DRAFT COPY

Title: About [Website Name].
Intro: [Website Name] is a publication focused on [approved primary subject].
Section 1 / Topics: Browse articles and resources covering the subjects available on this website.
Section 2 / Navigation: Explore All Articles, browse listed categories, or use Search.
Section 3 / Publisher: [Owner supplies approved information about the publication and its operation.]

Contact - information page, NOT a contact form

CONTACT / DRAFT COPY

Title: Contact [Website Name].
Intro: For inquiries relating to this website, use the verified contact information below.
Details: [email / phone / website / location only when actually supplied and approved].
Unavailable: Contact details are not available on this page yet.

Blog, Search and supporting UI labels

Context	Default editable/translated UI label
Blog heading	All Articles
Blog helper	Browse published articles from [Website Name].
Search heading	Search Articles
Search input label	Search this website
Search no-query	Enter a topic to search published articles.
Search no-results	No articles matched your search. Try another keyword.

Context	Default editable/translated UI label
Category	Articles in [Category Name]
Author	Articles by [Author Name]
404	We could not find that page. Return to Home or try Search.
Pagination	Previous, Next, Page [N] of [Total] (only when total is authoritative).

Legal pages - outline, not legal advice

Page	Approved-content section skeleton
Privacy	Who operates site; data categories; purposes; cookies/analytics; third parties; retention; rights; contact/updates.
Terms	Website access; informational content; permitted use; rights/IP; external links; modifications; contacts.
Disclaimer	Nature of content; limits; external sources; advice boundaries where applicable; updates/corrections.

LEGAL-GATE

Codex may render these headings as non-public starter drafts for editors, but must NOT enable/publish them automatically or invent tracking/privacy/payment/jurisdiction facts. Website owner (and counsel as appropriate) is responsible for final wording and approval.

D1 Hindi starter copy and localization rules

Hindi translations are examples for language-mode acceptance, not claims about website ownership or publication facts. Codex must preserve correctly shaped Devanagari text and give each page a locale-appropriate static label.

Localization architecture

• Site locale is server-owned configuration. Hindi/English UI labels belong to controlled i18n resources, not hardcoded per-site JSX.

• Use TYPE-11 Hindi typography for Standard; paragraph, list, headings, dates and mixed Latin snippets require accurate fallback.

• Owner-editable prose is not automatically translated. Display exactly authorized stored content, without hallucinated translations.

• Public published dates are absolute timestamps projected/formatted per eligible site locale/timezone.

• Do not add arbitrary client-language switches that mutate tenant ownership or SEO canonical routes without an approved contract.

Content and media authorization
